BEAR STAIR CHAIR

THE (BEAR) STAIR CHAIR

Is an innovative product that attaches to a conventional **Stair Chair frame**. Our product stabilizes the abdominal mass, thighs, and hips of obese/bariatric patients into the center of the Stair Chair.

Mission Statement

To help achieve the Golden Hour of patient care for Bariatric and Extra Large Patients while increasing safety to the patient and the transport crew.

Use the equipment you have – Our BEAR Stair Chair helps you get the most out of your existing equipment. Our BEAR Stair Chair will fit on all makes and models of rescue chairs.

Special Features- Our special unique internal slide is mechanics in motion. As the top **RED** and **BLUE** straps are secured, the internal slide causes the **YELLOW** and **GREEN** strap to draw up tight to the patients abdominal mass, thighs, and hips.

BEAR Benefits the Patient and the Transport Team- The BEAR Stair Chair is proven to reduce patient anxiety thus calming the patient and making the transport less stressful. The BEAR Stair Chair will stabilize the abdominal mass into the center of the chair eliminating side to side shift making the chair more maneuverable and less likely to tip.
