

## SWIFT™ 3000 Video Adapter

The first and only Laryngoscope Video Adapter

### Main Features

- Can be used with virtually any standard laryngoscope blade: Straight, curved, adult or pediatric blade size
- Multifunctional: Assists with endotracheal or a nasal intubation. Can be used for intubation confirmation
- Easy to assemble, natural to operate
- Economical
- Provides excellent quality image on a 2.5 inch color display
- Video glasses are available and especially useful in bright sunlight
- Portable
- Light weight
- Durable

### Why consider using the SWIFT™ 3000?

- Simplifies intubation by providing medical professionals with color image of a patient's anatomy to ensure that an endotracheal tube is quickly and properly inserted
- Ideal for patient intubation in the field or in the operating room. Efficient and affordable for EMT and emergency personnel training
- Works with standard laryngoscope blades. Miniature endoscopic probe with a wide view snaps to the blade. It then connects to the Video Monitor, attached to the top of the handle.
- Operational in seconds
- Standard video out signal is provided for use with large external monitor or a video recorder
- Video probes are reusable after standard disinfection or sterilization

The photo on the left demonstrates the excellent image of the mannequin's larynx

**Main Components** of SWIFT™ 3000 are a Video Probe and a Color Video Monitor

**Three Types of Video Probes are Available:**

Straight

Curved

Semi-rigid malleable

### Color Video Monitor

- Attachable to the top of laryngoscope handle
- Rechargeable
- Video Out connector for additional monitor or video recorder
- Optional Video Glasses

### Carrying Case

- Portable
- Durable
- Waterproof
- Available in two sizes:  
7.0" x 4.0" x 10.0" and 4.5" x 3.5" x 7.0"

SWIFT™ 3000 can be supplied with a short probe cable and a bottom monitor connector to improve user friendly set up

### Testimonials

"The SWIFT™ was recently needed on an emergency run, and the SWIFT™ video allowed me to perform the easiest intubation in my more than 20 years of experience."

Lt. Mike Bilkasley, Blue Ash Fire Department, Blue Ash, Ohio

" .... gives us a better way to more easily intubate someone in difficult situations. It makes our lives easier. It is better for our department, our patients and better for our community."

Asst Chief Chris Theadors, Blue Ash Fire Department, Blue Ash, Ohio
