

QUANTUM EMS ANNOUNCES THE LAUNCH OF “SWIFTLITE Q-110 THE LIGHTEST WEIGHT, LEAST EXPENSIVE TRACKED STAIR FOR THE NORTH AMERICAN MARKET

January 28, 2014

LAKE SUCCESS, NY, January 28, 2014 – Quantum EMS, is pleased to announce the launch of the lightest weight and least expensive track Stair Chair in the US Market. The Swiftlite Q-110 is now available through Quantum’s North American Distributors.

The QUANTUM Swiftlite Q-110 is a modified Q-100 single person operation stair chair incorporating 2 carry-handles that allows for two person operation, including upwards transport.

- Lightweight, quick & easy to use
- Versatile - Use along corridors and hallways
- Ascending and descending capability
- Folds away ready to use in seconds
- Foldaway handles for two person operation
- Large wheels for stability over rough terrain, dual wheel locks
- Antimicrobial protection
- Oxygen cylinder holder (optional)
- Dual Position Seat
- Head, Chest, Seat and Ankle Restraints
- Detachable Seat and Backrest
- Fixing Bracket
- Wall mount bracket, dust cover, and instructional DVD included with purchase
- 15 Year Warranty

Kris Bordnick, Vice-President of EMS Sales North America, issued the following statement in regard to the announcement – “Swiftlite provides a paradigm shift to what is currently available to EMS Providers in the North America. The history of cell phones or any old technology is a great parallel to Stair Chairs, remember when cell phones were large and bulky and heavy to use, today phones are slim, sleek, light weight, intuitive and durable. Swiftlite offers a new lightweight, sleek, durable, inexpensive alternative to the products currently available to the market”.

Bordnick also added, “The Swiftlite is one of three Stair Chairs we will be offering the US Market. The Swiftlite 100 is an untracked carry chair and the Swiftlite 120 is a stair Chair that has the capability to both ascend and descend stairs. The 110 and the 100 offer the same light weight, sleek, slim, durable design and inexpensive price point that is characteristic of our product line. We just launched the product into the US Market and one of our Distributor Sales Representatives Henry Schein EMS’s Alan Espinosa received the first United States order from Alpharetta Fire Department in Alpharetta, GA a prominent Fire Department in Metropolitan Atlanta.

During the in-service of the Swiftlite Jim Darling, EMS Coordinator for Alpharetta Fire Department had this to say “After watching a 100 pound EMT bring a 275 pound Firefighter down a set of stairs with ease using the Swiftlite Stair Chair, I was convinced that this device would help our personnel avoid the injuries and difficulties associated with lifting larger patients. That, coupled with the price, made the decision to purchase the Swiftlite Stair Chairs relatively easy.”

Details regarding the products can be obtained by contacting Quantum EMS directly at 516-321-9494 or by visiting www.quantum-ems.com
